

We are dreaming big

Together, we have the opportunity of a lifetime to create a community resource that will make a true difference for generations to come. Through our \$20 million *In My Dreams* campaign, we are building three new sites to help children transcend the limits imposed by disability and other challenges.

Our new sites — one in Brampton, another in Mississauga and a third in Oakville, will replace our patchwork of outgrown, outdated and largely inaccessible sites. These new sites, set to open in 2017, will more than double our treatment and therapy space, and offer:

- A controlled multisensory Snoezelen room for children with autism or developmental disabilities
- Accessible playgrounds for recreation therapy, physiotherapy and occupational therapy
- Therapeutic playrooms
- A warm-water therapy pool (Brampton site)
- Fitness facilities
- A 26-bed respite facility, the largest of its kind in the province, for children who are medically fragile/technologically dependent, have complex care requirements or autism (Brampton site)
