

Parkway Forest Community Centre
Toronto, Ontario

LEED SILVER

LEED EXPERIENCE

Client

Elad Canada Inc.

Architect

Diamond & Schmitt Architects

Project Completion Date

August, 2016

Type of Contract

Lum Sum

Project Value

\$20,114,000

Project Description

The new community centre is a 50,000-square-foot facility with a green roof, a commercial teaching kitchen and an adjacent rooftop garden.

Programming spaces and facilities include the neighbourhood's first full-size gymnasium plus a running track, multi-purpose room, arts and crafts room, youth lounge, meeting room, weight room, aerobics and dance studio, and a YMCA-run daycare. An outdoor pool and pavilion with change rooms is also part of the complex.

The centre achieves LEED Silver designation. It is the second such facility in the city to attain this level of certification and the first community recreation infrastructure built in the neighbourhood in 20 years.
